Soldering Conditions

Please refer to each product to see if it's compatible with lead-free soldering.

Conventional Soldering Conditions

SOLDERING IRON	DIP SOLDERING	REFLOW SOLDERING
Iron Tip Temperature: 300°C Max. (30W Max.) Soldering Time: 3 Seconds Max. Location: At least 3.0mm away from resin	Pre-heat: 80°C Max. / 60 sec. Max. (Resin surface temperature) Bath Temperature: 260°C Max. Dipping Time: 5 sec. Max. Position: At least 3.0mm away from resin body	Not recommended

Lead-Free Soldering Conditions

SOLDERING IRON	DIP SOLDERING	REFLOW SOLDERING
Iron Tip Temperature: 400°C Max. Soldering Iron: 30W Max. Soldering Time: 3 Seconds Max. Position: At least 2.0mm away from resin	Pre-heat: 100°C Max. / 60 seconds Max. (Resin surface temperature) Bath Temperature: 265°C Max. Dipping time: 5 sec. Max. Position: At least 2.0mm away from resin body	Not recommended

Cleaning

Residual solder of flux left on the LED housing could reduce intensity and could affect the optical characteristics. Excess flux can be removed by the following chemical method:

1. Cleaning solvents (dipping time: 3 minutes maximum at normal temperature)
   - Ethyl alcohol
   - Isopropyl alcohol
   - Pure water (after cleaning, the water must be removed by drying)
   - Drying condition: 90°C max., 30 sec. max. and 4 times max.
2. The effect of ultrasonic cleaning on the LED resin body depends on such factors as the oscillator output, size of PCB and LED mounting method. Ultrasonic cleaning is strongly recommended after confirming that there are no problems.
   1. Ultrasonic wave frequency: 28 kHz or 40 kHz
   2. Output: 20 W/l
3. The solvent for freon equivalent (recommended after confirming that there are no problems).
   - AK-225AES
   - Clean through
   - Pine alpha ST-100S

Chemicals	Freon substitute detergent
Ethyl alcohol	AK225AES
Isopropyl alcohol	Clean through 705H
Pure water	Pine alpha ST-100S

* DIP Soldering and cleaning is not recommended for Alpha-Numeric (AAR121and AAA121) LED displays.

SUPER BRIGHT LED NUMERIC DISPLAY (SEVEN SEGMENT DISPLAY)

Stanley's Numeric Displays which incorporate super-bright LEDs produce vivid, brilliant displays. Available colors are red, pure green, green, yellow and orange. Display types include segment type (character heights 7.5mm to 25mm) and the alpha-numeric type (character heights 25mm and 51mm). These are suitable for dynamic drive due to the low-current drive characteristics.
